## Summary

Frontend Developer with 3+ years of experience building enterprise web applications across banking, e-commerce, healthcare, transportation, GIS/map-based systems, and Web3 domains.

Strong experience with React, Next.js, Vue, Nuxt, and TypeScript. Experienced in setting up frontend architecture, developing complex business workflows, integrating REST APIs, building reusable UI components, migrating legacy systems, and supporting code reviews.

Experienced in collaborating closely with backend, QA, and client teams to clarify requirements, resolve integration issues, and deliver stable, maintainable frontend solutions with a strong focus on user experience.

## Technical Skills

**Languages:** TypeScript, JavaScript

**Frontend:** React, Next.js, Vue 3, Nuxt 3, Ant Design, Vuetify 3, Tailwind CSS, styled-components

**State Management & Data Fetching:** React Query, Zustand, Redux, Redux Toolkit

**Forms & Validation:** React Hook Form, Zod

**API & Real-time:** Axios, REST API, Socket.IO, WebRTC

**Visualization & Maps:** Recharts, OpenLayers

**Web3:** wagmi, WaaS SDK, Polygon

**Tools:** Git, Jira, Fork, Storybook, i18n

**Backend Basics:** Node.js, Express.js, MySQL

## Experience

CÔNG TY CỔ PHẦN CÔNG NGHỆ EKOTEK

December 2024 - Now

Frontend Developer

**Project: AML (anti-money-laundering)**

(Banking Environment – Japan)

- Developed frontend modules for an AML BackOffice platform supporting customer management, screening, risk assessment, transaction monitoring, and AI scoring workflows.
- Developed the frontend using Nuxt 3, Vue 3, TypeScript, and Vuetify, following a modular architecture with Nuxt Layers.
- Integrated domain-based REST API clients, handled form validation, loading/error states, and search criteria synchronization with URL query parameters.
- Worked closely with backend teams to resolve integration issues, align API behavior with frontend requirements, and ensure stable delivery across authentication, configuration, and logging flows.

**Tech stack:** Nuxt 3, Vue 3, TypeScript, Vuetify 3

**Project: HRM System Upgrade (Nuxt 2 → Nuxt 3)**

(Banking Environment – Japan)

- Migrated the HRM system from Nuxt 2 to Nuxt 3, refactoring code to align with Vue 3.

- Designed the frontend architecture and set up the base project using Nuxt 3 & Vuetify 3.
- Standardized project structure, including routing, layouts, plugins, theming, and TypeScript configuration.
- Collaborated with clients and QA during testing and debugging to ensure release stability.
- Participated in code reviews, following coding standards and best practices.

**Tech stack:** Nuxt 3, Vue 3 (Composition API), TypeScript, Vuetify 3

### **Project: Taxi Admin Platform**

#### **Project Description:**

Web Admin system for a taxi/ride-hailing platform, supporting operational staff in managing users, drivers, and bookings, monitoring trip status, and handling daily dispatch operations for the Japanese B2B market.

**Role:** Frontend Developer (FE Lead)

- Took ownership of frontend development, building the architecture and base source code for the taxi/ride-hailing admin system.
- Developed core modules including User, Driver, and Booking with complex business workflows.
- Collaborated with backend teams to integrate APIs and implement end-to-end booking and dispatch flows.
- Reviewed code and mentored frontend team members; handled build and bug fixing.

**Tech stack:** React, TypeScript, React Query, React Hook Form, Zod, Ant Design, i18n, Axios, [Socket.io](#)

### **Project: SANO – Health Data Management & Analytics Platform**

#### **Project Description:**

A web-based health management platform that aggregates and visualizes data from Garmin wearable devices, providing health analytics dashboards for end users and administrative tools for configuring health metrics, insights, and wellness programs.

**Role:** Frontend Developer (FE Lead)

- Developed core frontend modules for the health data platform, supporting user health dashboards and administrative configuration.
- Built the foundational frontend source code, serving as the base for feature development across the team.
- Implemented UI based on Figma designs and collaborated closely with backend teams to deliver end-to-end features.
- Supported team members through technical guidance and code reviews, and handled bug fixing and debugging to ensure system stability and code quality.

#### **Technologies:**

Next.js, React, TypeScript, Zustand, React Query, Tailwind CSS, Ant Design, Axios, i18n, Recharts

### **Project: METAME – Wallet as a Service (WaaS) Integration**

- Integrated a WaaS SDK to provide secure, password-based internal wallet access without exposing private keys at the application layer.
- Implemented password-based wallet onboarding and authentication via WaaS SDK, supporting NFT and token transfers.
- Built core trading flows (buy/sell/list/transfer NFTs) with real-time transaction tracking and secure session handling.

#### **Technologies:**

Next.js, React 18, TypeScript, wagmi, WaaS SDK, Polygon, [Socket.io](#)

## **Project: EC Platform – Admin & End-user (Digital Audio E-Commerce)**

- Developed admin portal and user-facing e-commerce platform for digital audio content targeting the Japanese market.
- Implemented content, user, transaction, notification management and role-based access control.
- Built shopping cart, checkout with Stripe, audio streaming, and secure download features.
- Supported multilingual (JP/EN), responsive UI, and optimized SEO with SSR.

### **Technologies:**

React, Next.js, TypeScript, Ant Design, React Query, Zustand, Redux Toolkit, Stripe, [Socket.io](#)

### **Freelancer**

Ha Noi, Viet Nam

Frontend Developer

**Team:** (3 members: 2 front-end, 1 back-end)

## **Project: AVT WEB SERVER - Military Object Management Software on the Map**

- Participated in the development of a map-based object management system supporting spatial data monitoring, tracking, and reporting.
- Designed and optimized features for visualizing objects, areas, and movement history based on GIS data.
- Implemented a layer management mechanism to enable flexible and efficient toggling of map layers.
- Optimized map rendering performance and real-time interactions to ensure smooth user experience.

## **Project: MARINER25 – Maritime Surveillance & Intelligence System (Map-based)**

- Developed frontend features for a map-based maritime monitoring system supporting real-time vessel tracking and spatial data analysis.
- Integrated and visualized multi-source maritime data (AIS, radar, satellite, GSM, satphone) with historical movement tracking.
- Implemented rule-based detection and real-time alerts to support operational decision-making.
- Optimized frontend rendering to efficiently handle datasets of up to 1M records.

### **Technologies:**

NextJS, TypeScript, Ant Design, React Query, TailwindCSS, Zustand, OpenLayers

### **VNPT Technology**

Ha Noi, Viet Nam

Software Engineer

August 2022 - August 2024

Contributed to the development of multiple internal enterprise products and digital platforms, serving a large-scale user base.

## **Projects: DX Modules / OneSME / BOS / OneDX Workplace**

- Developed and maintained core frontend modules for CRM systems, enterprise management platforms, and digital workplace solutions.
- Built user interfaces based on a design system, ensuring consistency, scalability, and long-term maintainability.
- Participated actively in code reviews to ensure code quality, adherence to conventions, and best practices.
- Collaborated closely with backend engineers and cross-functional teams to analyze requirements, resolve defects, and enhance features.
- Performed testing, debugging, and optimization to improve user experience and application performance.

## **UI Component Library – @onesme/dxui**

•

- Contributed to the development and maintenance of a shared UI component library used across multiple projects.
- Authored usage documentation and guidelines to support effective adoption by product teams.
  - Ensured UI consistency and reusability, helping reduce development time and improve overall development efficiency.

**Technologies:**

ReactJS, NextJS, TypeScript, Ant Design, React Query, Redux, TailwindCSS, Styled-components, Storybook, CraftJS, i18n
